

Aircraft Maintenance Engineer (AME)

Permanent, Full-time

Location

Calgary, Canada

Job Description

We are seeking an experienced Aircraft Maintenance Engineer (AME) for one of our clients, to join their team in Calgary. This role requires a fully independent engineer with hands-on experience on piston aircraft, specifically the Piper Navajo.

Details

- Aircraft Maintenance Engineer (AME) – Piper Navajo
- Location: Calgary, Canada (Commutable or Relocation Supported)
- Start Date: ASAP

Key Requirements

- Valid Transport Canada MI License
- FAA A&P License considered an asset (or willingness to obtain – supported by employer)
- Proven experience on piston aircraft (Piper Navajo experience required)
- Ability to work independently without supervision

Operations

- Operation Type: CARs 702 & 703
- Work Environment: Combination of base Calgary and field operations (Quebec incl)

Core Responsibilities

- Perform line maintenance and scheduled inspections
- Conduct troubleshooting and snag repairs
- Provide avionics support
- Complete maintenance sign-offs
- Order parts and manage inventory as required
- Maintain aircraft cleanliness and operational readiness

Compensation and Benefits

- Salary: To be determined
- Per diem: To be determined (for field work)
- Schedule: 40 hours/week (base), with field work as required
- Benefits: Health, dental, and RRSP plan
- Vacation: 3 weeks annually

Additional Requirements

- Willingness to train on RAAS maintenance software
- Strong work ethic and adaptability in both base and field environments

Note: Candidates must already be experienced and fully competent on the Piper Navajo. Training on this aircraft type will not be provided.
